THE SAVERGLASS DIFFERENCE

HIGH QUALITY PREMIUM GLASS & DECORATION

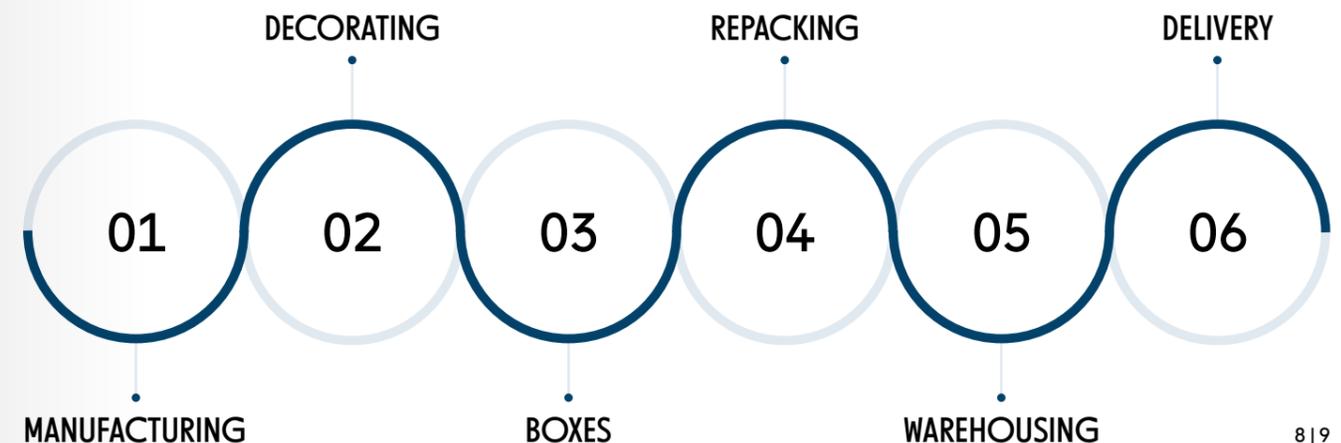

- Our mission is to offer bottles with innovative design, that combine optimal weight and high quality, with no risk for consumers.
- Our International School of Glass assures our master craftsman consistency across our global facilities.
- Our externally validated commitment to efficient and consistent quality as well as customer satisfaction dates back to 1993, when Saverglass became the first glass manufacturer to receive ISO 9001 Certification.

INTEGRATED LOCAL SUPPLY CHAIN SUPPORT

- Dedicated sales, customer service, quality control and logistics team.

COMPREHENSIVE PACKAGING SOLUTIONS

We're your high quality one-stop shop for your packaging needs; shifting your supply chain management into a simple, streamlined and convenient process, including reducing your carbon footprint.

STOCKING PROGRAM SPIRITS

A state of the art Class A multi-service warehouse located near the Washington and Oregon border offers our customers easy access to a growing selection of floor stock bottles providing access to pre designed bottles quickly and without compromising on quality.

- Speed to market, allowing you to bypass design and immediately tap into available inventories.
- Better value for uncompromised quality, as you only pay for your share of larger overall runs (where similar models produced for multiple customers).
- A wide variety of unique shapes in extra white flint color to differentiate your products.
- Minimum order is one bulk pallet.
- Stock can vary with options added based on customer demand.

ULTRA PERSONALIZATION NEW RIFF CASE STUDY

Developing packaging of very high quality is much more than a simple project. Success is often defined through trusted partnership and informed discussions founded on four pillars: creation, mastering tailor-made solutions, technical advise and project monitoring.

PERSONALIZED SAVERGLASS DESIGN
+ ORGANIC SCREEN-PRINTING
+ COATING

Established in 2014 and now available in all 50 states, New Riff swiftly strummed into the Kentucky bourbon market with a new riff on an old tradition: Kentucky Bourbon. The new riff emulates a 200 year tradition in the bourbon industry through their own unique stamp: a recipe that includes something they could only produce in northern Kentucky using fresh water from the aquifer directly below the distillery. Founder and packaging expert, Ken Lewis, knew his new riff required stand out, versatile packaging to meet their unique and expanding product lineup. To accomplish this, they chose the Saverglass-designed SINGLE bottle.

CUSTOMIZATION VICTORIA DISTILLERS CASE STUDY

SCREEN PRINT VS PAPER LABEL

Now the number one selling gin in the US, Victoria Distillers, located in Sidney, British Columbia, Canada, became the first distillery in the world to offer an indigo colored gin. To dress up Empress 1908 Indigo Gin, the brand wanted a bottle that represented the royal influence of Queen Victoria, while showcasing the unique color of its spirit.

They recently transitioned to a screen-printed label on one size of the Saverglass-designed OXYGEN bottle. Can you identify which bottle size features the screen-printed label?

BESPOKE CASTLE & KEY DISTILLERY CASE STUDY

COMPLEX DESIGN, OVERNIGHT SENSATION

In 1887, Colonel Edmund Hayes Taylor built a new kind of distillery destination that brought Bourbon tourism to Kentucky. The historic property ended up in ruins until Will Arvin meticulously restored it and reopened the property as Castle & Key. The packaging they launched with was being lost on the shelf so they worked with a designer & Saverglass to produce this now iconic packaging, perfectly representing their brand while incorporating key elements from the distillery.

CSR ROADMAP

From cleaner energy to smarter operations, we're taking measurable steps to reduce our carbon footprint. Scan the QR code to learn more about our decarbonization strategy in action.

IT'S ALL ABOUT NATURE

TRANSFORMING OUR PROCESSES TO REDUCE OUR CARBON FOOTPRINT

In order to contribute to the fight to curb global warming, and to reduce our environmental footprint, we are committed to developing a more sustainable glassmaking process.

- 1. Optimizing our usage of RAW MATERIALS AND PRESERVING RESOURCES
- 2. Reducing our INDIRECT EMISSIONS
- 3. Innovating to change the WAY WE WORK
- 4. Reducing the WEIGHT OF OUR BOTTLES
- 5. Investing in LOW-CARBON FURNACES

IT'S ALL ABOUT PEOPLE

GUARANTEEING THE SAFETY OF OUR TEAMS AND SUSTAINING OUR EXPERTISE

The objective of our social policy is twofold: to guarantee good working conditions - in terms of safety, pay, well-being and mobility - and to sustaining the wealth of know-how present within the Group.

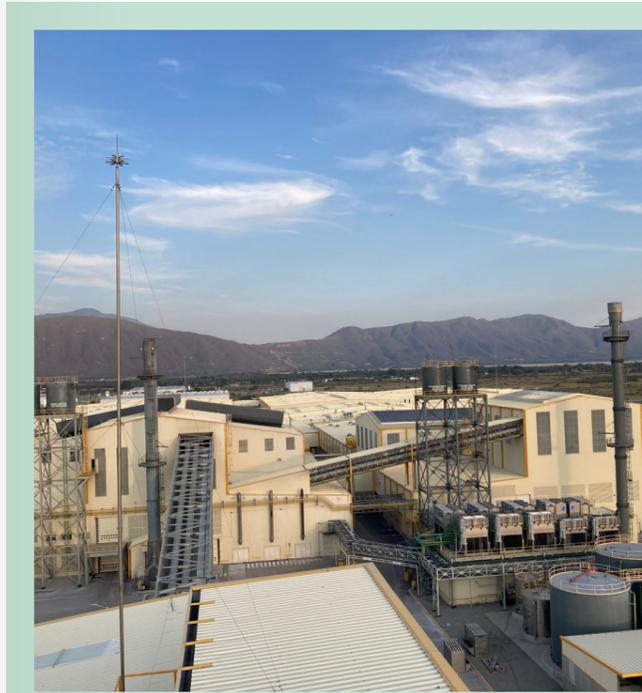

- 1. Looking after the HEALTH AND SAFETY OF ALL COLLEAGUES
- 2. Nurturing and DEVELOPING SKILLS
- 3. COMBINING ECONOMIC DEVELOPMENT WITH QUALITY OF LIFE AT WORK
- 4. Increasing DIVERSITY AND EQUAL OPPORTUNITIES

IT'S ALL ABOUT COMMUNITIES

SUPPORTING LOCAL DEVELOPMENT

As a growing business, we have a duty to participate, in our own way, to the sustainable development of the territories in which we are rooted.

- 1. Contributing to LOCAL ECONOMIES AND SOCIETIES
- 2. Expanding our RESPONSIBLE PURCHASING EFFORTS

Glass has many advantages, including being infinitely recyclable, but its production is energy intensive. One of our biggest levers to greatly impact our CO₂ emissions is the energy we use to power our furnaces.

IMPLEMENTATION OF A CARBON-FREE NUCLEAR ELECTRICITY SUPPLY AT OUR MEXICAN SITE

The transition from carbon-based electricity to carbon-free electricity enables us to significantly reduce our CO₂ emissions on site.
